

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number Spidervverse Idk

Your Name Julian Daneman

Your Team Member's Name Dhanvin Tandon

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

- 1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.**

We divided the work by iterations. The iterations that I completed were:

- Iteration 0
- Iteration 1A
- Iteration 2A
- Iteration 3, feature 1
- Bonus feature

- 2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.**

We divided the work by iterations. The iterations that my partner completed were:

- Iteration 1B
- Iteration 2B
- Iteration 3, feature 2
- Iteration 3, feature 3

- 3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.**

Overall, my experience was quite good. We divvied up the work very well and worked and communicated together very well. Our only issue was that perhaps we could have learned about and understood each other's sections of the code more in depth.
