COMPENG 2SH4 Project – Statement of Contribution

Your Group Number   Spiderverse Idk

Your Name   Dhanvin Tandon

Your Team Member's Name   Julian Daneman

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

We divided the work by iterations, I did the following iterations:

- Iteration 1B
- Iteration 2B
- Iteration 2, feature 2 and 3

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

- Iteration 0
- Iteration 1A
- Iteration 2A
- Iteration 3, feature 1
- Bonus feature

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

My experience was quite phenomenal. We worked through the iterations and divided up the work evenly and communicated changes through text and commit messages. If we had any issues we worked on them together. The issue was that the iterations were a bit disjointed and so it was hard to see what the other partners code did without comments.
